

SQL EXPERTS.ORG

SQL SERVER SOLUTION PROVIDER

COUNT ON US IF YOUR SITUATION IS ANY OF THE FOLLOWING:

- Your SQL Server is **slow**
- **T-SQL code review** is desirable
- Your database design, data migration, SSIS, or daily processing is **far from ideal**
- You would like to get a professional **second opinion** on your database/server application(s) configuration overall architecture
- You have a **specific problem** that you would like to address efficiently and ASAP
- You would like to test and possibly improve your application and/or **poor database performance**
- You have a **general or specific need** for Data Analysis, Reporting, Data Warehousing
- Your stored procedures and other database objects **need optimization**
- Your SQL Server lacks **security**
- You want to have a **warm-standby server** with effective failover in case of disaster
- You need a detailed **disaster recovery** plan
- You **do not have a budget** to hire a dedicated full-time DBA

Feel free to contact us if you would like to learn in more details how exactly we address each of the above situations (AND MANY MORE!), what tools we use, how long certain solutions and services may take, etc.

Last but not least!

One of the most important differences between us and other providers is that we are based in the USA yet we can offer services at offshore prices! In addition to fully remote support and other services, we can arrange scheduled meetings with our project manager in person.

Call or email us for details.

Telephone: (267) 281-4133
